Polydactyl all 4 legs	93
Long Legs	97
Short Legs	98

## Additional Information to the EMS Code

The repartition in categories 1-4 will be presented for voting in next GA. It is now not binding.

\*Breeds/colours recognized in one of the World Cat Congress member associations, but not yet in the formal WCF Standard of Points- . (accepted breed). They must be registered in the experimental registry, by adding ex. behind the Registration Number or in the RIEG registry. They can be entered at WCF shows and receive all titles.

\*\*New experimental breeds. Being in the process of recognition in WCF and having a provisional standard of points. They can receive experimental pedigrees, may be registered and exhibited, can participate in WCF Rings, but can not receive titles.

\*\*\* New experimental breeds in the process of recognition in any other World Cat Congress member. They cannot receive pedigrees in WCF. They can be shown in the WCF but not receive titles. The provisional standard of points of the association that works on the recognition of this breed needs to be presented to the judge before judgement.

\*\*\*\* The Thai breed can carry the byname "Wichianmat" which is the original name for this breed in Thailand.

\*\*\*\*\* Amber and Sunshine only for Breeds, where colour standard determines: all colours recognized or where amber is explicitly recognized. The colour variety "Sunshine" will be validated in the next GA after proposal from the judges commission.

\*\*\*\*\* The EMS colour code 03 is restricted to the breeds: PER; BLH; TLH; SFL; BRX; SLH; BRI; EXO; SFS; SSH; RAG; SNO; SRX; SRL where a certain amount of white is required(bicolour). All other breeds use the EMS colour code 09: any amount of white permitted. (with white)
